

SECURE ENTERPRISE MDM SOLUTION

COMMUNICATION MADE SIMPLE

Enterprise mobility is a complex management challenge. A combination of purpose-built devices, corporate-liable smartphones and tablets, and BYOD is necessary to drive productivity and business growth, but can be difficult to manage with point solutions. PMGC's MDM solution powered by SOTI® unifies mobility management from a single management console, removing the complexity from managing a multi-OS, multi-vendor, and multi-purpose mobile ecosystem.

Manage All Devices from a Single Pane of Glass

With the deployment of consumer smartphones and tablets into corporate liable and BYOD programs, enforcing security policies and best practices while supporting diverse user requirements can be a tough balancing act. Enterprise mobility is changing the dynamics of the brick and mortar workplace to an on-demand, virtual environment accessible at anytime, anywhere and from any device.

Safeguard from Mobility Threats & Viruses

Safeguarding the enterprise from potential threats while maintaining an enjoyable user experience can be a major challenge to effectively manage and grow your organisation. MobiControl Panel's best in class authentication, certificate management and data encryption provide enterprise IT departments with peace of mind that their devices and data are never compromised. Secure web browsing and real-time malware scanning protect enterprise networks from internal and external threats.

Secure Access to Corporate Content

MobiControl Panel's Secure Content Library is the ideal platform for securely distributing and managing corporate content to your mobile workforce. Supporting all major formats, files can be delivered flexibly one-to-one, one-to-many or one-to-all. Secure Content Library gives you fine grained control over your content, allowing administrators to set priority levels, document expiry, and location based delivery.

Enable Access to & Privacy of Corporate Email

Mobile email management is more than just providing mobile access to your corporate Exchange server. Enterprises must ensure sensitive corporate data stays behind the firewall. With MobiControl, administrators can create email sharing and forwarding policies to protect against data leakage and inadvertent disclosure of sensitive company information. Comprehensive Exchange Access Controls prevent unmanaged devices from accessing the Corporate Exchange Server.

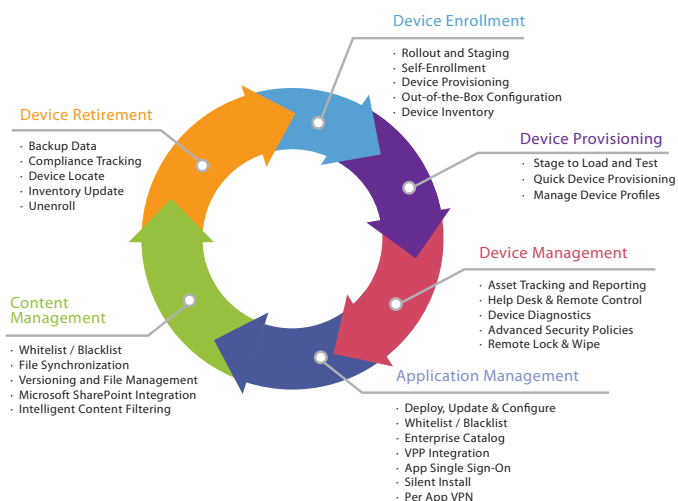

Empower Employees with Corporate Applications

Applications are at the center of every enterprise's mobility strategy. Secure access to line of business applications gives employees the tools they need to be productive and allows enterprises to realise the full potential of a mobile workforce. MobiControl helps you get the right applications to your mobile workforce in a fast, secure and scalable manner. Application Catalog gives users a one-stop shopping experience for corporate approved apps. Enterprises looking for more granular control over corporate-liable devices have the added flexibility to silently install mandatory applications. Robust whitelist and blacklist policies provide an extra layer of security across your deployment.

Intuitive User Experience Flexible, Powerful & Configurable

MobiControl Web Console allows you to manage your entire mobility deployment through a single pane of glass. Customisable dashboards provide administrators with an at-a-glance view of key device and usage information such as status of connectivity, device information, location and active policies. Mobile device users get a best-in-class experience when accessing corporate content, applications and messages all within one easy to navigate app.

End-to-End Mobility Management

Flexible Deployment Architecture Always Available and On-Demand

MobiControl solution is robust and reliable at any scale of deployment. Leveraging deep domain expertise with thousands of customers globally in all major vertical and niche markets, Our service also provides enterprises with flexibility to deploy the solution as an On-Premise solution or in the MobiControl Panel Cloud.

Configurable Administration Mission-Critical Content Safeguarded

MobiControl Panel role-based access ensures only authorised users can view and manage enterprise assets. MobiControl alert rules engine can be quickly configured to monitor device, custom data and server specific incidents. Administrators can identify when a device is compromised and take immediate action to safeguard their corporate data.

Advanced Reporting Engine Strategic Management Insights

The MobiControl Panel management console can be used to generate an extensive catalog of standard and custom reports on key areas of your enterprise mobility environment. High level or granular analytics can be automated and pre-scheduled to monitor numerous parameters over a specified time period. Reports can be generated and exported in all major file formats.

Remote Control & Remote View Live, Real-Time Support

MobiControl Panel's Remote Control is the fastest and most reliable interactive remote control of Android and Windows devices for optimal Help desk capability and troubleshooting, as well as remote view and advanced device management available for iOS devices. These best-in-class remote helpdesk capabilities offer administrators the ability to support their growing mobile workforce effortlessly.

Real-Time Geo-Aware Policies Devices Tracked & Access Limited Based on Location

MobiControl Panel provides accurate geo-location device tracking and user behavior monitoring that can be plotted on an interactive worldwide map. Geofencing enables the creation of a virtual boundary around a geographical area to trigger alerts and pre-defined actions when devices enter or exit the boundary. Geo-aware content access allows enterprises to restrict access to sensitive corporate content based on location while still giving employees access to their personal content and applications.
